EDUCATION

South China University of Technology

B.Eng. in Electrical Engineering

Selected courses: Electric Circuits, Power System Analysis, Power Electronics, Analog Electronics, Digital Electronics, Automatic Control Theory | GPA: 3.85 / 4.0 or 90.11 / 100 | Rank: 3 / 31

RELEVANT EXPERIENCE

Frequency Support using LCC-HVDC

Dec. 2022 – Present

Supervisor: [Prof. Ying Xue](#)

- Replaced the AC transmission lines with LCC-HVDC in PSCAD for the four-machine two-area model
- Verified the decoupling effect of LCC-HVDC on the frequency of the two areas through simulation

Photovoltaic Hosting Capacity Estimation in Radial Distribution Networks

Jul. 2022 – Nov. 2022

Supervisor: [Prof. Ying Xue](#)

- Proposed a simple yet effective approach to estimate photovoltaic hosting capacity in radial distribution networks using bus voltage and line parameters
- Found that there exists a strong linear relationship between the square of bus voltage and PV output. Found that the increment of line losses mainly happens on the branches from the substation to PV-connected bus

Multi-level Energy Exploitation Based on Hydrogen Storage

May. 2022 – Jul. 2022

Supervisors: [Prof. Jiehui Zheng](#) and [Prof. Zhigang Li](#)

- Incorporated the electric energy converted from renewable energy sources such as wind energy and solar energy into the grid or used it for electrolysis to generate hydrogen for storage
- Achieved multi-level energy utilization of integrated energy through fuel cell power generation, waste heat utilization of hydrogen energy storage, and synthesis of industrial raw materials

IoT-based Off-grid Solar Panel Monitoring System

Apr. 2022

Supervisor: [Prof. Mengshi Li](#)

- Designed an off-grid solar panel monitoring system integrated on a phone-sized PCB
- Utilized the wide coverage characteristics of NB-IoT network to adapt to various application scenarios

PUBLICATIONS

- **Zhiyi Zhao**, Conghuan Yang, Ying Xue, Zhaoxi Liu, Weiye Zheng, “A Novel Estimation Method for Maximum PV Hosting Capacity in Radial Distribution Networks using Bus Voltage and Electrical Distance,” *Electric Power Systems Research*, submitted.

ACTIVITIES

Guangdong-Hong Kong-Macao Greater Bay Area Summer School 2021, CUHK

Jul. 2021

- Read excerpts from classic texts such as Plato’s *The Republic* and Newton’s *The Principia* in the course [UGFN1099: Reading Nature](#) taught by [Prof. WONG Wing Hung](#). Wrote several reflection journals in English

Summer in Japan 2021, Kyushu University

Jul. 2021

- Received a scholarship equivalent to the tuition fee, which is only awarded to “applicants whose academic records are evaluated as particularly strong by the SIJ selection committee”
- Achieved S (90-100) grades in the chosen courses *Interdisciplinary Lecture Series (ILS)* and *Japanese Language Course (JLC)*
[The program reflection](#) was posted on the program’s official website

AWARDS

- National Scholarship (Top 0.2% national-wide) Dec. 2022
- First Prize in the 1st [Electrical & Electronics Engineering Innovation Competition](#) (Southern Division) Jul. 2022

SKILLS

- **Language:** CET-6 551, IELTS 6.5 (7.5 / 7.5 / 6 / 5.5, under [EOR](#))
- **Programming:** C++, Python
- **Tools:** Matlab/Simulink, PSCAD, Multisim, Quartus, T_EX, Visio, Origin
