isyzhz@gmail.com | www.zhiyizhao.xyz | +86 157-3605-8772

EDUCATION

South China University of Technology

B.Eng. in Electrical Engineering

Selected courses: Electric Circuits, Power System Analysis, Power Electronics, Analog Electronics, Digital Electronics, Automatic Control Theory | GPA: 3.85 / 4.0 or 90.11 / 100 | Rank: 3 / 31

RELEVANT EXPERIENCE

Auxiliary Frequency Control using LCC-HVDC

Supervisor: Prof. Ying Xue

- Replaced the AC transmission lines with LCC-HVDC for the four-machine two-area model in PSCAD
- · Verified the decoupling effect of LCC-HVDC on the frequency of the two areas through simulation

Photovoltaic Hosting Capacity Estimation in Radial Distribution Networks

Jul. 2022 - Nov. 2022

Dec. 2022 - Present

Supervisor: Prof. Ying Xue

- Proposed a simple yet effective approach to estimate photovoltaic hosting capacity in radial distribution networks using bus voltage and line parameters
- Found that there exists a strong linear relationship between the square of bus voltage and PV output. Found that the increment of line losses mainly happens on the branches from the substation to PV-connected bus

Multi-level Energy Exploitation Based on Hydrogen Storage

May. 2022 - Jul. 2022

Supervisors: Prof. Jiehui Zheng and Prof. Zhigang Li

- Incorporated the electric energy converted from renewable energy sources such as wind energy and solar energy into the grid or used it for electrolysis to generate hydrogen for storage
- Achieved multi-level energy utilization of integrated energy through fuel cell power generation, waste heat utilization of hydrogen energy storage, and synthesis of industrial raw materials

IoT-based Off-grid Solar Panel Monitoring System

Apr. 2022

Supervisor: Prof. Mengshi Li

- Designed an off-grid solar panel monitoring system integrated on a phone-sized PCB
- Utilized the wide coverage characteristics of NB-IoT network to adapt to various application scenarios

PUBLICATIONS

• Zhiyi Zhao, Conghuan Yang, Ying Xue, Zhaoxi Liu, Weiye Zheng, "A Novel Estimation Method for Maximum PV Hosting Capacity in Radial Distribution Networks using Bus Voltage and Electrical Distance," *Electric Power Systems Research*, submitted.

ACTIVITIES

Guangdong-Hong Kong-Macao Greater Bay Area Summer School 2021, CUHK

Jul. 2021

• Read excerpts from classic texts such as Plato's *The Republic* and Newton's *The Principia* in the course *UGFN1099: Reading Nature* taught by Prof. WONG Wing Hung. Wrote several reflection journals in English

Summer in Japan 2021, Kyushu University

Jul. 2021

- Received a scholarship equivalent to the tuition fee, which is only awarded to "applicants whose academic records are evaluated as particularly strong by the SIJ selection committee"
- Achieved S (90-100) grades in the chosen courses *Interdisciplinary Lecture Series (ILS)* and *Japanese Language Course (JLC)*The program reflection was posted on the program's official website

AWARDS

- National Scholarship (Top 0.2% national-wide)

Dec. 2022

- First Prize in the 1st Electrical & Electronics Engineering Innovation Competition (Southern Division)

Jul. 2022

SKILLS

- Language: CET-6 551, IELTS 6.5 (7.5 / 7.5 / 6 / 5.5, under EOR)

- **Programming:** C++, Python

- Tools: Matlab/Simulink, PSCAD, Multisim, Quartus, TeX, Visio, Origin
