Zhiyi Zhao

Guangzhou, China 510641 | +86 15736058772 | isyzhz@gmail.com

Education

Tsinghua University

2024.09 - 2027.07 (Expected)

Shenzhen, China

M. S. in Electrical Engineering, <u>Tsinghua-Berkeley Shenzhen Institute</u>

2020.09 - 2024.07 (Expected)

South China University of Technology

Guangzhou, China

B. Eng. in Electrical Engineering, School of Electric Power

- **GPA:** 3.8 / 4.0, Advised by *Prof. Ying Xue*
- **Relevant Coursework:** Electric Circuits, Power System Analysis, Power Electronics, High Voltage Engineering, Automatic Control Theory, Electromechanics, Analog Electronics, Digital Electronics

Online courses: Optimization in modern power systems, Technical University of Denmark

- Gained preliminary knowledge in linear programming and quadratic programming
- Learned how to formulate economic dispatch problem and DC optimal power flow (DC-OPF) problem
- Got a preliminary understanding of AC-OPF problem and its non-convex nature

Publications

• **Zhiyi Zhao**, Ying Xue*, Zhaoxi Liu, Weiye Zheng, Shuyin Duan, Lei Yu, "A Novel Estimation Method for Maximum PV Hosting Capacity in Radial Distribution Networks using Bus Voltage and Electrical Distance," *Electric Power Systems Research (JCR Q2, IF:3.9)*

Awards

• China National Scholarship (Top 0.2% national-wide)

2023.10

• China National Scholarship (Top 0.2% national-wide)

2022.10

Research Experience

Auxiliary Frequency Control using LCC-HVDC

2022.12 - 2023.03

- Replaced the AC transmission lines with LCC-HVDC for the four-machine two-area model in PSCAD
- Verified the decoupling effect of LCC-HVDC on the frequency of the two areas through simulation
- Gained preliminary insights into the auxiliary frequency control capability of LCC-HVDC through simulation

Photovoltaic Hosting Capacity Estimation in Radial Distribution Networks 2022.07 - 2022.11

- Proposed a simple yet effective approach to estimate photovoltaic hosting capacity in radial distribution networks using bus voltage and line parameters
- Found that there exists a strong linear relationship between the square of bus voltage and PV output
- Found that the increment of line losses mainly happens on the branches from the substation to PV-connected bus

Activities

Summer in Japan 2021, Kyushu University

2021.07

Summer School Program

Fukuoka, Japan

- Received a scholarship equivalent to the tuition fee, which is only awarded to "applicants whose academic records are evaluated as particularly strong by the SIJ selection committee"
- Achieved S (90-100) grades in the chosen courses Interdisciplinary Lecture Series and Japanese Language Course

Skills

Language: IELTS: 7 (7.5 / 7.5 / 6 / 6.5)

Programming: C++, Python

Tools: MATLAB/Simulink, RSCAD/PSCAD, TEX, Visio, Origin
