# **Zhiyi ZHAO**

isyzhz@gmail.com | www.zhiyizhao.xyz | +86 157-3605-8772

#### **EDUCATION**

#### South China University of Technology

B.Eng. in Electrical Engineering

**Selected courses**: Electric Circuits, Power System Analysis, Power Electronics, Analog Electronics, Digital Electronics, Automatic Control Theory | **GPA**: 3.79 / 4.0 or 90.11 / 100

Online courses: Optimization in modern power systems given by Prof. Spyros Chatzivasileiadis

- Gained preliminary knowledge in linear programming and quadratic programming
- Learned how to formulate economic dispatch problem and DC optimal power flow (DC-OPF) problem
- Got a preliminary understanding of AC-OPF problem and its non-convex nature

#### RESEARCH EXPERIENCE

### **Auxiliary Frequency Control using LCC-HVDC**

Supervisor: Prof. Ying Xue

- Replaced the AC transmission lines with LCC-HVDC for the four-machine two-area model in PSCAD
- Verified the decoupling effect of LCC-HVDC on the frequency of the two areas through simulation. Gained preliminary insights into the auxiliary frequency control capability of LCC-HVDC through simulation

## Photovoltaic Hosting Capacity Estimation in Radial Distribution Networks [Slides]

Jul. 2022 – Nov. 2022

Dec. 2022 - Mar. 2023

- Supervisor: Prof. Ying Xue
- Proposed a simple yet effective approach to estimate photovoltaic hosting capacity in radial distribution networks using bus voltage and line parameters
- Found that there exists a strong linear relationship between the square of bus voltage and PV output. Found that the increment of line losses mainly happens on the branches from the substation to PV-connected bus

### **PROJECTS**

#### Multi-level Energy Exploitation Based on Hydrogen Storage [Slides]

May. 2022 - Jul. 2022

Supervisors: Prof. Jiehui Zheng and Prof. Zhigang Li

- · Applied the waste heat generated from electrolysis and fuel cell discharge to seawater desalination or integrated it into the heat network
- Synthesized industrial raw materials such as methanol by combining the hydrogen from the storage system with the captured carbon dioxide from thermal power plants

#### IoT-based Off-grid Solar Panel Monitoring System [PDF]

Apr. 2022

Supervisor: Prof. Mengshi Li

- · Designed an off-grid solar panel monitoring system integrated on a phone-sized PCB, providing users with real-time data
- Utilized the wide coverage and low power consumption features of NB-IoT to cater to applications in remote and isolated areas

#### **PUBLICATIONS**

• Zhiyi Zhao, Ying Xue, Zhaoxi Liu, Weiye Zheng, Shuyin Duan, Lei Yu, "A Novel Estimation Method for Maximum PV Hosting Capacity in Radial Distribution Networks using Bus Voltage and Electrical Distance," *Electric Power Systems Research*. [Link]

#### **ACTIVITIES**

#### Summer in Japan 2021, Kyushu University

Jul. 2021

- Received a scholarship equivalent to the tuition fee, which is only awarded to "applicants whose academic records are evaluated as particularly strong by the SIJ selection committee"
- Achieved S (90-100) grades in the chosen courses *Interdisciplinary Lecture Series (ILS)* and *Japanese Language Course (JLC)* The program reflection was posted on the program's official website

### **AWARDS**

- National Scholarship (Top 0.2% national-wide)	Oct. 2023
- National Scholarship (Top 0.2% national-wide)	Oct. 2022
- First Prize in the 1st Electrical & Electronics Engineering Innovation Competition (Southern Division)	Jul. 2023

# **SKILLS**

- **Language:** IELTS: 7 (7.5 / 7.5 / 6 / 6.5)

- **Programming:** C++, Python

- Tools: Matlab/Simulink, PSCAD, TEX, Visio, Origin
